

## The Law That Should Be Made

Have you ever thought about garbage in the water? I have. I think there should be a law that you can't put garbage by or in water. People shouldn't just go and throw a soda bottle in the water. Soda cans and garbage can desinigrate and cause pollution. It isn't healthy to you and your family. There should be a thousand dollar fine for doing that.

You should not dump garbage in water because somebody may die. Don't litter either because it may go into the water. Some fish or you or your child can get severely sick or die by choking. Garbage should not get dumped close to people or water.

The garbage causes pollution and stinks. You should try to recycle and cut down garbage as possible. Then you won't have to waste a lot of money on bags for garbage!

Now do you think a law should be in effect. Some people could die or get sick by garbage in the water. It is also disgusting! Now you understand? Good! That is what has to happen. So don't pollute and make the world a better place.
